PROFESSIONAL SUMMARY

Computer Science graduate with 3 deployed full-stack web applications and hands-on experience in React, Node.js, MongoDB, and REST API development. Adept at building responsive, production-grade interfaces with clean architecture and secure authentication. Passionate about crafting scalable solutions with strong attention to code quality, performance, and user experience.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)
Backend: Node.js, Express.js, REST API Design
Database: MongoDB, Firebase Firestore, MySQL
Security: JWT Authentication, Environment Variable Management, API Key Security, HTTPS
Soft Skills: Communication, Self-driven Delivery, Remote Collaboration, Problem Solving

EDUCATION

B.E. – Computer Science & Engineering | [Bannari Amman Institute of Technology](#) 2021 – 2025
Sathyamangalam | CGPA: 7.52 / 10.0

Higher Secondary Certificate (HSC) | [Saru Matric Higher Secondary School](#) 2021
87.35%

Secondary School Leaving Certificate (SSLC) | [Saru Matric Higher Secondary School](#) 2019
81.6%

PROJECTS

MartX – Full-Stack Grocery E-Commerce App

2024 – 2025

React · Node.js · Express · MongoDB · JWT · REST APIs · Vercel

- Built and deployed a production-grade grocery e-commerce application with a React frontend, Node.js/Express backend, and MongoDB — featuring JWT authentication, product catalogue, cart, checkout, and a complete admin dashboard.
- Designed 20+ RESTful API endpoints with proper HTTP semantics and real-time data flow between frontend React components and backend services.
- Built a fully responsive UI with 15+ reusable React screens; deployed on Vercel with GitHub-based CI/CD workflow and secure environment variable management.

Netflix Clone – React + Firebase + TMDB API

2024

React · Firebase Auth · Firestore · TMDB API · Vercel

- Developed a fully functional streaming UI clone using React, Firebase Authentication, and Firestore, integrated with the TMDB API to render real-time movie metadata across 4 curated categories with embedded trailer playback.
- Implemented horizontal scroll navigation, toast notifications, and clean component separation across auth, browse, player, and search; deployed on Vercel with secure API key management.

Cine-Hunt – Real-Time Movie Search App

2024

HTML · CSS · JavaScript · OMDb API · Vercel

- Built a responsive movie search application in vanilla JavaScript consuming the OMDb API, with live debounced search, type and year filters, smooth pagination, and direct IMDb redirection.
- Implemented async/await API calls with robust error handling for rate limits, empty results, and network errors; debounce optimisation reduced redundant API calls by approximately 70%.

INTERNSHIP

Data Analysis & Visualization Virtual Intern | [Forge](#)

2024

- Applied Python for data analysis and visualisation, generating structured analytical reports from real datasets.
- Worked fully remotely and independently, delivering results on schedule with clear written communication throughout.

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank Problem Solving – Bronze Badge (Python, Java)
- NPTEL: Data Structures & Algorithms (2023)
- Active open-source portfolio on GitHub demonstrating continuous full-stack development.
